

Compare the SIG Programs

Below is a summary of the key characteristics of each SIG (Special Interest Group) to help you choose the one best suited to your cycling experience and fitness level. Details on each SIG can found by clicking on the column headers.

	C-SIG	B-SIG	A-SIG	A-SIG Classic
Number of rides	9 (including a classification ride in Central Park)	10 (including a classification ride in Central Park)	12	12
Number of participants (maximum)	100	180	60	80
What kind of cycling experience do I need?	You must know how to ride a bike (no, we're not kidding!) and be able to control the bike. Second, you must be able to maintain a minimum average pace of 10 mph for 3 laps of the Central Park loop (18 miles). Third, you should be willing to commit to attending all rides, to follow instructions from your ride leaders, and to have fun. Being a beginner cyclist is an advantage, in a way. We like to start at the beginning and train you our way. Having no previous bad habits to overcome is good!	We assume you have at least basic familiarity with the shifting and braking system on your bike. In terms of basic fitness, you should be able to complete a 40-mile ride, with a lunch break and 1 or 2 pit stops along the way. (If you've never done a 40-mile ride, try to simulate one in Central or Prospect Park.) In terms of speed, you should be able to complete 4 laps around Central Park in 2 hours or less. (Our fastest B18 riders will be in at 85 minutes or less.) On top of that, you should be open to coaching, serious about safety, and eager to have fun.	The A-SIG is designed to remove the mystique from becoming an "A" rider; group riding experience is helpful but not essential (B and C SIG graduates are welcome!). You must be comfortable and confident operating a road bike over significant distances and challenging terrain outside of the city; you must put in the training necessary to match the fitness level and physical efforts of your fellow participants; and you must want to learn and be coached.	Group riding experience in rotating pace lines is strongly recommended but not required (B and C SIG graduates are welcome!). You must be comfortable and confident operating a road bike over significant distances. This includes shifting, and experience riding with clipless pedals. Training outside of the weekly Saturday rides is critical. The A-SIG Classic is serious training, and it will require an equally serious commitment of time and effort from you. Participants must be willing to accept coaching and critique from leaders and want to learn and ride safely.
Will I ride with the same people every week?	Yes, we divide riders into groups with different riding speeds, depending on each rider's classification time. You will ride with this group for the entire SIG.	Yes, you will ride with the same 12 or so riders and 3 or 4 leaders every week. You will be grouped with those of similar speed and ability.	No. Groups vary every week in order to expose you to different types of riding and coaching.	No. Groups vary every week in order to expose you to different types of riding and coaching.

	C-SIG	B-SIG	A-SIG	A-SIG Classic
How far will I ride?	Rides progress from approximately 15–30 miles to 55–60 miles.	Rides progress from approximately 40 miles to 85 miles (with option for a century).	Rides progress from approximately 40 miles to 100 miles.	Rides progress from approximately 40 miles to 100+ miles.
How fast and hard will I ride?	Groups typically begin at 11–14 mph and progress to 14–17 mph towards the end of the C-SIG. All groups start slower and ride for fewer miles, then gradually build up speed. The speed of the faster C-SIG groups is usually approximately the same as the slower B-SIG groups, but with less distance or hills.	Participants will be divided into groups based on their results in a timed classification ride of 4 laps around Central Park. The pace levels of the groups are 16, 17 or 18 mph—that's cruising speed on flat terrain, not average speed over a whole ride. All groups start at slightly slower speeds over the first few weeks.	The A-SIG begins slowly in order to focus on skills. We focus on uniform/consistent effort, not speed, but by the final weeks you will be riding >20 mph on flat terrain. The A-SIG will challenge you physically and mentally; while we strive to avoid pushing you to your limits, the very nature of our curriculum will in all likelihood extend those limits.	We ride at a slightly faster average pace than the A-SIG. Be prepared to ride 10 mph with us when learning to paceline—the time you spend riding that slow will help foster the skills you will need to ride 21 . . . 22 . . . 23+ by the end of the SIG. You will push yourself harder and farther than you ever imagined you could.
How hilly are the routes?	Generally flat and rolling terrain. Based on the Group's ability, some challenging hills may be included at the discretion of the ride leader. Ride leaders provide encouragement and regroups as necessary.	Our routes progress from "moderate" to "challenging." What does that mean? The first few rides (40–50 miles) will entail about 2,500 ft of climbing. Rides in the middle of the program (55–65 miles) will range from 3,000–4,000 ft of climbing, and the later rides (70–90, or 100, miles) will range from 4,500–5,500 ft of climbing. Don't worry if that sounds daunting—if you stick with the program and get in your midweek workouts, you should be fine.	We ride some of the most well-known climbs in the area with >6000 ft of vertical gain on longer rides.	We ride some of the most well-known climbs in the area with 6000+ vertical gain on longer rides.
Will I learn to ride in a rotating paceline?	No. We teach single file group riding, and we start with a healthy gap between bikes. The gap will narrow over the course of the SIG, but you should be comfortable riding within the group.	Yes, we teach pacelining but not until the 5th or 6th week. After that, whether and how much each group will paceline is up to the leaders' assessment of the group's ability and its desire to do so.	Yes, pacelining is a core aspect of the A-SIG. After week 3, all rides will be done in a rotating single or double paceline.	Yes, pacelining is a core aspect of the A-Classic. After week 3, all rides will be done in a rotating single or double paceline.

	C-SIG	B-SIG	A-SIG	A-SIG Classic
Will I need to train during the SIG?	It is very important to your enjoyment of the C-SIG training if you can get out and ride a few times during the week to maintain the conditioning that you are building.	One or two midweek workouts are highly recommended, with one of those preferably a training ride. Full details and suggestions for workouts can be found in the B-SIG Riders Guide. Shortly after the SIG begins, ad hoc groups will start forming for early morning/late afternoon rides in Central and Prospect Parks.	Yes. One or two high-intensity, mid-week training rides (15–20 miles) as well as at least one low-intensity dedicated recovery ride are recommended in the weeks prior to and during the SIG.	Yes. One or two high-intensity, mid-week training rides (15–20 miles) as well as at least one low-intensity dedicated recovery ride are recommended in the weeks prior to and during the SIG.
What type of bike do I need?	A road bike is recommended, although hybrids and mountain bikes are acceptable. Not permitted in the C-SIG: recumbents, tandems, single-gear bikes, BMX bikes and aero bars, baskets and panniers.	Most folks will have road bikes, but hybrid, cross and mountain bikes are acceptable--provided they have smooth, not knobby, tires and don't have suspension. Note: No aero bars allowed! Your bike should accommodate two water bottles (unless you ride with a camelback-type backpack). A basic cycling computer is required by the third week.	Road bikes with integrated, brake-hood shifters only, no exceptions (no hybrids; no bar-end or bottom-tube shifters). No aero bars. No "bar mitts" (we need to see your hands! No ear buds or headphones. Two frame-mounted bottle cages with water bottles filled with water and/or sports drink.	Road bike, no exceptions. No aero bars. Two bottle cages with water bottles filled with water and/or sports drink.
Do I need <u>clipless pedals</u>?	It is not required that you have clipless pedals. If you are new to clipless pedals, it's best for you to start the SIG without them. They do take practice getting used to, and as we will be doing group riding, good bike control affects not just you, but others around you. Once the SIG starts talk with your group's ride leaders for guidance on this and tips for making the transition to clipless pedals.	No. Most participants will have them, and they are a good idea, but plenty of folks complete the B-SIG without clipless pedals. If you are new to clipless pedals, though, make sure you are comfortable clipping in and out before you start the SIG.	Yes, with sufficient riding experience to clip in and out with ease.	Yes, with sufficient riding experience to clip in and out with ease.
