JUNE 1982

# NEW YORK CYCLE CLUB

16 Stuyvesant Oval  
New York, N.Y. 10009

May 5, 1982

Bill Wojtech, Editor  
NYCC Bulletin  
4111 Ave. R  
Brooklyn, N.Y. 11234

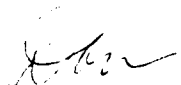

Dear Bill:

I read with interest Irv Weisman's report on "Disaster on the G.W. Bridge -- Averted," in the May Bulletin.

Jeff Bogumil is a spoilsport. It would have been better if he just quietly rode off on his tandem. As a result of his interference, we have missed one of the major events of the season. Imagine the sight of 100 NYCC riders marooned in New Jersey -- probably camped out for several weeks. At night, one would be able to see the flickering of their fires from Washington Heights. Fort Lee would probably become a desirable place to visit.

But of course, this is just wishful thinking. We all know that Irv would again save the day. With a wave of his hand, the waters would be parted, and the children of NYCC would enter the promised land.

Best regards,

Dan Smith

## GUIDELINES FOR CLUB RIDES

NYCC rides are intended to be friendly group rides; we don't like to "drop" or lose anyone. Riders whose physical or bicycle condition seem inadequate for the ride are to be turned back by the leader. Our leaders are truly reluctant to do this, so please cooperate with them:

- 1) Select rides within your capabilities - avoid downgrading the ride for your fellow riders and stressing yourself "trying to keep up"; or, conversely, demanding a faster pace than advertised.
- 2) Be on time or a bit early. Rides will leave promptly.
- 3) Have your bike in good condition: both brakes working, properly inflated tires, adjusted derailleurs, no loose parts.
- 4) Bring water, snacks, spare tube, patch kit, pump and lights for after dark.

## RIDE CLASSIFICATIONS

We'll do a lovely ride up the east side of the Hudson River, past beautiful views of the Palisades and some lovely mansions to a pleasant little park on a spit of land right in the Hudson River. Bring or buy lunch. Also bring spare tube, patch kit, pump and lock. For further information, call Maggie evenings.

This road is closed to non-motorized traffic after the early morning. There will be a food stop in Nyack. The ride will be cancelled if the National Weather Service (976-1212) predicts that it will rain before 10:00 am. >Please help today -  
R.J.H.

Urgently request your help this week on two critical bicycle transportation matters--Queensborough Bridge access, and bicycle report release.

1. Queensborough Bridge Bicycle/Pedestrian Access is scheduled to be terminated or severely restricted by the NY State Department of Transportation with the start of construction in mid-June, following May 7 contract award.

The Queensborough is an increasingly important link for New Yorkers traveling by bike or foot between Manhattan and Queens. Only in recent months has there been any question about continuation of access, earlier thought firmly assured. The NY City Department of Transportation supports continued access.

Serious efforts are urgently needed to arrange contractor workspace and storage in an efficient manner to provide continued safe access with minimal impact on traffic. Assurance is needed that contractor employee parking will not be permitted.

Should the threatened termination of full-time access take place next month, the bridge may no longer be eligible for \$19.4 million in federal funds currently budgeted. Under 23 USC 109(n), enacted by the Congress in 1978, the US Secretary of Transportation is prohibited from approving federal funding for any project which severs bicycle/pedestrian access. The defense that construction time is not included is supported by neither statutory language nor legislative history.

\* Action Needed: Call and write NY State Transportation Commissioner William C. Hennessy, 1220 Washington Avenue, Albany, NY 12232/(518) 457-4422, and Assistant NYS Transportation Commissioner John A. Marino, 2 World Trade Center--Room 5454, New York, NY 10047/(212) 488-6613, to urge prompt assurance of continued full-time bicycle/pedestrian access on the Queensborough Bridge.

2. State Assembly Staff Report. A significant report on bicycle transportation was prepared last year by the Assembly Program Development Group, but not released. This February Assembly staff requested several bicycle groups to provide names for distribution, then expected within weeks, but delayed by budget and other issues. There is now no assurance that this valuable report will be released.

\* Action Needed: Call and write Assembly Speaker Stanley Fink, State Capitol, Albany, NY 12224/(518) 455-3791, or 270 Broadway, New York, NY 10007/(212) 488-7960, to urge prompt release of this important report and serious consideration of associated legislation.

Advisory Update. Please advise me within a week of your efforts on bridge access and report release, for inclusion in my next bicycle transportation advisory.

## LEADERLESS RIDES

Leaderless rides can be just as well organized as the regular rides; in fact, the only difference is that no prior commitment is needed. Maps are not necessary, but they can be useful.

People do come out for these rides, so don't worry about being the only one to show up. As a matter of fact I had 5 riders on a leaderless ride to Nyack. I only had one rider on each of my scheduled club rides last year.

These rides are great opportunities for scouting out new routes. One idea that I've had is that we could explore the areas that our 25 and 50 mile marked routes go through to create spur routes and branch out. The club routes don't use all the nice cycling roads in these areas.

In short the leaderless rides are good for experimenting with new ideas.

## THE MODERN MAVERICK: BICYCLE MESSENGERS

This month a participant-observer of NYC bicycle messengers will tell us about the lives and philosophies of these modern 'mavericks'. Dr. Jack Kugelmass is an associate in anthropology at the Max Weinreich Center for Advanced Jewish Studies at YIVO Institute in New York City, and he studied messengers while working as one himself. His studies led to an article in the August, 1981 issue of Natural History.

We also have club members who are or have been messengers. So join the crowd for a lively session about a group of professionals who are just about as varied as you could imagine.

Our meeting will be June 3 at Artemis Restaurant, 76 Duane Street (just off Broadway, two blocks north of City Hall). Come at 6:00 to greet, 7:00 to eat, 8:00 to meet, and 9:00 for a treat.

## Board of Directors Meeting

### SUMMARY OF MINUTES (UNAPPROVED):

1. To fill the unexpired term of Gloria Lasoff, who recently resigned as A Rides Coordinator, the board appointed Ed Schweber.
2. The board discussed the problem of getting more leaders--there is no problem getting ride participants!
3. The practice of ride reports being given at the general membership meeting (not done in recent months) was discussed.
4. The abundance of weekend trips this year was pointed out, apparently confirming the belief behind the defeat of the resolution at the April general membership meeting--that leaders' expenses do not have to be paid in order for them to lead weekend trips.
5. Bill Vojtech volunteered to complete the special issue of the bulletin for new members begun by Chris Mailing.
6. Irene Walter reported that summons are being given out to bicyclists for lack of lights at night, and bells, and will get more information.
7. The next board meeting will be held June 1, 1982.

Copies of the complete, approved minutes are available from Irene Walter.

### THE WEDDING OF THE GEAR (to two NYCC members, at least!) by Irene Walter

The bride wore white satin--and rode a bike. The groom chose a brown suit--and rode a bike. The guests were merry in their finery--and rode bikes. It was the WEDDING PROCESSION BICYCLE TOUR, led by Carole Irene Chavanne and James David VerEecke, on Saturday, May 1, 1982--the first day of American Bike Month, and their wedding day.

On the backs of separate "chauffeured" tandem bikes, cheered on by spectators along the 0.9-mile route, they led 30 bikers from 106th Street and West End Avenue to Sakura Park at 122nd Street and Riverside Drive. There, at 5 p.m., they took off their helmets and exchanged wedding vows, rings, and kisses.

They had arranged for safe bicycle parking so their bicycling guests could enjoy the Reception at nearby International House. The hall was decorated with American Bike Month and Five-Boro Bike Tour posters, and the wedding cake with--you guessed it! They left the next day for a three-week wedding trip through Southern France by--right again!

Carole, New York City's Bicycle Safety Coordinator, says she met engineer Jim when both were directing bicycle traffic through Herald Square during the 1980 transit strike. Ken Abramson avers he introduced them. It's all water under the slow boat to China now.

DAISY, DAISY ... it won't be a stylish marriage, we can't afford a carriage -- but we'll look sweet, upon the seat, of A BICYCLE BUILT FOR TWO.

May 11, 1982

The attitudes and goals of the Reagan Administration are such that the bicycle movement, as it operates on the federal level, has had to shift its tactics to the defensive. Instead of continuing to make new gains, a major portion of the League of American Wheelmen's effort is now devoted to preserving what has already been achieved. One such defensive action involves the renewal of the Clean Air Act, as the following excerpt from the May 1982 issue of American Wheelmen, the League's monthly bulletin, indicates.

★ LEGISLATIVE ALERT ★ LEGISLATIVE ALERT ★

**Air quality jeopardized by House bill**

H.R. 5252, a bill now being considered by the Energy and Commerce Committee of the U.S. House of Representatives, would double the level of permissible auto emissions for carbon monoxide and nitrogen oxides, relax existing protection against deterioration of air quality in clean-air areas, and push back deadlines for states to clean up air in polluted areas.

The bill probably will come out of committee for a floor vote by the entire House in May. Please write *now* to your U.S. representative (at House of Representatives, Washington, DC 20515) asking him or her to support continued strong auto emission standards, existing protection for clean-air areas, and early deadlines for state implementation plans.

Ralph Hirsch  
National Legislative Director  
League of American Wheelmen

While it is true that the Clean Air Act in its present form has never been rigorously enforced in New York City, it is also true that every new automobile which is built in, or imported into, this country does have to conform to the emissions standards contained in the Act. If those standards are weakened, the air quality in New York will become noticeably worse, and the incidence of lung cancer in the city will tragically and inevitably increase. As bicyclists who ride regularly and frequently in the midst of heavy city traffic, we would be among the most immediate victims of such conditions.

On Friday, May 7th, I was advised by the League's legislative director that the chairman of the House Energy and Commerce Committee, who favors weakening the clean air standards, has temporarily postponed hearings on H.R. 5252 for the expressly-stated purpose of allowing industry lobbyists more time to poison the minds of the legislators against the preservation of those standards. Consequently, the bill is not expected to come before the full House for a floor vote before the end of May. The time to write to your congressional representative is now.
