GUIDELINES FOR CLUB RIDERS

NYCC rides are intended to be friendly group rides; we don't like to "drop" or lose anyone. Riders whose physical or bicycle condition seem inadequate for the ride are to be turned back by the leader. Our leaders are truly reluctant to do this, so please cooperate with them:

1) Select rides within your capabilities - avoid downgrading the ride for your fellow riders and stressing yourself "trying to keep up" or, conversely, demanding a faster pace than advertised.

2) Be on time or a bit early. Rides will leave promptly.

3) Have your bike in good condition: both brakes working, properly inflated tires, adjusted derailleur, no loose parts.

4) Bring water, snacks, spare tube, patch kit, pump and lights for after dark.

5) Eat a good breakfast.

RIDE CLASSIFICATIONS

"A+": ANIMALS: Anything goes. Eats up roads, hills and all.
"A": SPORTS(WO)MEN: Vigorous riding over hill and dale. High regard for good riding style. Can take care of themselves anywhere. Stops every two hours or so.
"B": TOURISTS: Moderate to brisk riding along scenic roads, including hills; destination not so important. Stops every hour or two.
"C": SIGHTSEEERS: Leisurely to moderate riding. Destination oriented: nature, historical, cultural. Stops every half to one hour.
"D": BEGINNERS: Very leisurely sightseeing. Discovering bike and their bodies; training up to "C." Frequent stopping and regrouping. Do not believe reports of mere mortals riding 100 miles or more in a day.

May Club Meeting Program

ACCIDENT PREVENTION NIGHT

Carole Chavanne, V.P./Programs

Have you had a bicycle accident? Did it happen on a club ride? Is there anything we can learn from your experience?

Join us on Tuesday, May 10, when we will view the film, "Only One Road," which is about the bicyclist/motorist traffic mix. The film details accident types and trends, and interviews actual accident victims. After the film, those who feel that relating the accidents they have had may prevent future accidents for someone else are welcome to share their stories with all of us.

During the cocktail hour, we will have a Bicycle Repair Fair. There will be demonstrations of the 2-minute bicycle check, how to fix a flat tire, and emergency road repairs. Note: The Repair Fair may be postponed if inclement weather prevents demonstrators from bringing their bicycles.

Be at Artemis at 6 p.m. on Tuesday, May 10. Artemis Restaurant is at 76 Duane Street (just off Broadway), which is 2 blocks north of City Hall. Subway instructions: Lexington IRT: Brooklyn Bridge stop; A train and 7th Avenue IRT: Chamber Street Station.

Is being inundated recently with cartoons from members a hint of some kind? ???

Keep 'em coming, folks!

I'll go on ahead and take some photographs of you pushing the tandem up the hill.

QUALIFYING RIDES FOR THE 1983 PARIS - BREST - PARIS by Steve Bauman

The Paris-Brest-Paris is unique among the continental classics because it is open to the public. It also qualifies as the oldest race, having started back in 1891. At 1250 kilometers (750 miles), it is the longest single stage race.

There are several levels to participation. First there is the contest to win. Winners have completed this course in under 44 hours! Second, there is the contest to complete the course within the allotted 90 hours. For those mathematically inclined, this is an overall 8.1/3 miles per hour, making this, in reality, a very long "C" ride.

This ride is run every four years under the auspices of the Audax Club Parisien. Four New Yorkers completed the P.B.P. in 1979. They were Maxim Vickers, Joe Katz, Steve Bauman and Jim Rex. In all only 30 odd Americans have completed this ride.

Two advantages of the long intervals between P.B.P.s are that you have sufficient time to recover and that you have a long time to brag about your accomplishment to your fellow club members.

In order to participate in this year's P.B.P., you must first successfully complete qualifying rides of 200, 300, 400 and 600 kilometers. These rides must be run under the Audax randomneur formula. Steve Bauman will be running qualifiers of 200, 400 and 600 kilometers on May 15, June 4, and June 11/12 respectively. In addition, Steve will be arranging transportation for the 600-kilometer qualifier which will be held in Syracuse over the July 4th weekend.

For further details, contact Steve Bauman at 212-755-7972.

CORRECTION ON A CORRECTION - by Bill Vojtech

Last month I stated that the Union generator is self-limiting and does not need the diodes described in the previous month's article, to prevent high speed bulb burnout. I have since been informed that the generator's self-limiting ability is poor at best, and that the diode system mentioned should be used.

So You've Had an Accident

Diane Shafer, M.D.

Diane Shafer is an orthopedic surgeon and has been a bike rider for twenty-five years. She says that her bike saved her sanity in medical school, and that she didn't drive a car until she became an M.D. She has made house calls, gone to graduation, and gone to church on her bike.

She has been attending physician in emergency rooms in four different areas of Pennsylvania, and has conducted a survey of bicycle accidents treated at those facilities. The type and severity of accident differed with location.

In Philadelphia the biker was rarely at fault, but had been forced into the sidewalk or otherwise squeezed by traffic.

Erie's accidents were rare but usually extremely serious, as they happened in conditions of ice and fog when visibility was minimal.

Titusville accidents were caused by gravel and twisting roads, as well as hitting wild animals.

In a low-income section of Harrisburg, 80% of the accidents involved thirteen- to seventeen-year olds who had darted into traffic or knocked down pedestrians.

Before you examine your bicycle assess your own injuries and plan treatment that will get you home or to a health care facility. As soon as possible place ice on the injured part, elevate it, and rest it.

For minor injuries such as bruises and road rash, be sure to remove the sticks and stones. Clean the wound with soap and water and put a sterile dressing on it once you get home. A brush sometimes helps remove road grit that can cause an infection.

If you injure a joint such as an elbow or a shoulder, do not try to "work it out." Instead, apply a sling to protect and rest the injured joint. Use a scarf, shirt, or jacket folded to the correct shape. A spare tube doubled or tied to proper length also works well, as does a Windbreaker with the sleeve pinned to the pocket for support.

Splints can be improvised from pumps. If you sustain a forearm or wrist injury, place the pump on the palm side and secure with inner tube, handlebar tape, or whatever you have. If you have a magazine along, place the arm in it for support. If a hand is injured, splint it with an orange and an Ace bandage, or ball up your shirt, place it in your palm, and cover it with a sock. If a knee, ankle, or foot is injured be sure to protect it and don't put your weight on it. A pillow taped around an ankle, foot, or knee makes a comfortable splint.

In helping accident victims, remember your ABC's—maintain Airway, Breathing, Circulation (i.e. a pulse). If they are unconscious and something is broken, splint them where they are lying. Treat the head, neck, and shoulder region as a unit. If you suspect any injury to the head or spinal column, do not move the person. If the person is lying in a dangerous place and must be moved to safety, place a board under the head-neck-shoulder area in position found. But better yet, block traffic until help arrives.

If you think that a large bone of the leg is broken, splint it to the other leg with inner tube or tape.
AR&FA’s First Annual Survey of Sports Orthopedists

Approximately 30 percent of all running injuries involve the knee. If you injure your knee or have any other musculoskeletal ailments, the American Running and Fitness Association suggests that you go to a sports orthopedist, a physician specializing in disorders of the musculoskeletal system and related motor functions. In addition to knees, orthopedic specialty areas include the ankle, back, elbow, foot, hip, neck, shoulder, and wrist.

Services provided by sports orthopedists can include an initial examination and diagnosis, therapies, exercise prescription, musculoskeletal rehabilitation, physical therapy, bracing, orthotics, surgery, and, if necessary, emergency care.

AR&FA’s Survey includes active and associate members of the American Orthopaedic Society for Sports Medicine and AR&FA members who have indicated their interest in sports orthopedics. Physicians are listed alphabetically by state, city, and name. Orthopedists who are also runners are identified with an asterisk (*).

Those who did not respond to our questionnaire as this issue went to press are listed by name and address only.

AR&FA would like your feedback when you visit sports-oriented physicians. Your input will be helpful in future referrals. Also, if you are or know of a sports orthopedist not included in this survey, please let us know so we can make additions to our list.

From Running & Fitness, November/December 1982.
NYCC PUBLIC RELATIONS COMMITTEE - by Doug Blackburn, Chairman

The NYCC Public Relations Committee is alive! The Board of Directors has authorized the committee to proceed with its programs and specific action plans. The committee’s purpose is to plan, direct and carry out activities which will present to the public a positive image of bicycling and of NYCC and its members. The activities will be primarily educational, directed both outwardly and toward NYCC members.

We will maintain contact with other New York cycling groups and will work with them in areas of mutual interest.

Our initial program will be a series of letters to editors of selected NYC publications. We have a list of topics and have prepared several letters in draft form. We welcome your ideas on additional topics.

Here’s another way you can help: On May 14 and 15, the Central Park Conservancy is sponsoring a "Park Appreciation" weekend. In addition to many activities, the Conservancy will run contribution booths. Everyone entering Central Park will be asked to contribute $1.00. We suggest you make a contribution while wearing your NYCC shirt. Let people see that NYCC supports Central Park!

I’d like to thank the following people whose creativity and energy resulted in the committee:

Carole Chavanne  Lorraine Gewirtz *  Martha Ramos *  Jerry Scher *
Lin Erlich *  Roger Herz  Jim Rex

The * designates people who will continue on as committee members.

CYCLOPS SEES...

There’s a brand-new bottom bracket for Carole Chavanne and Jim Ver Eecke to maintain now: Helene (rhyming with clean) Chavanne Ver Eecke, prominent these past six months, became visible Monday morning, March 21, 1983, when all 7 lbs 15 oz of her arrived on the first day of Spring, just in time for the new bicycling season. Dad said “it was an all-night affair.” Haw, haw!

Many, many more, Jim and Carole! and welcome, Baby Helene, to the NYCC scene!

Wedding bells rang out on Long Island for Frank Sanchez and Agnes Sheehan as they married on December 4, 1982, and settled down in North Merrick. Telephone Company retiree Frank, and teacher and "neighborhood cyclist" Agnes, honeymooned in Columbia, South America, then vacationed at the Wheelmen’s Winter Rendezvous in Homestead, Florida, in March.

May your married life continue to be one long honeymoon and vacation, Frank and Agnes!

"HAVE you ever had one of those mornings when you can't seem to do anything right?"
