Once again the none-too-stable American economy and crushing administrative pressures (coupled with only the very slightest degree of professional pride) have conspired to force a pure artiste like myself to sully the sanctity of this bulletin cover format to do a trashy, self-serving, one-step-up-from-a-Psychic Freinds infomercial cover to promote the return of the original, official, sold-out-in-one-evening last year...

NYCC rides are friendly group rides by people of similar riding abilities. A volunteer leader plans the route and maintains the listed pace (e.g. B15pace = B Style/ 15 mph speed - see charts). **RIDE STYLE** indicates the type of riding. See chart left. **CRUISING SPEED** indicates the ride's speed on flat terrain. Over rolling terrain, **AVERAGE RIDING SPEED** is 3 mph less than cruising speed; **OVERALL SPEED**, including all rest and food stops, is about 6 mph less than cruising speed. These speeds will vary plus or minus 1 mph according to terrain. **SELF-TEST**: Assess your personal cruising speed by riding 4 laps (24.08 miles) around Central Park at a comfortable pace and matching your time with the chart at left. **NOTE**: Riding fewer than 4 laps will give you a false assessment. *(The northern end of the path can be dangerous; ride with other cyclists)*. **YOUR FIRST NYCC RIDE**: For your own enjoyment, be conservative. Choose a ride easier and shorter than you think you can ultimately handle. You won't enjoy struggling to keep up, nor make new friends by causing them to wait for you. It's a good idea to call the leader a day or so before the ride, and to introduce yourself when signing up at the start. **WEAR YOUR HELMET! NO HEADPHONES.** **BEFORE ANY RIDE**: Check that your bike is in good riding condition: brakes and derailleurs working, tires pumped to the pressure specified on the sidewalk. Eat breakfast. **BRING**: spare tube water **SUGGESTED**: lock patch kit snacks rail pass tire levers medical ID map pump emergency phone # money Leaders may specify other items in their ride listings. **WEEKEND EVENTS**: These are in hilly country. You should be able to cruise at 14 mph, otherwise you may not find any groups to ride with. **BIKE TRAINS**: Saturdays and Sundays from April 16 through November 30, MetroNorth has scheduled specific trains to/from Grand Central Station to accommodate large groups of cyclists. **From GCT**

**Dept. of Emendation: Messenger Division**

Rob Kotch, owner of the Breakaway Courier Company, reports Bicycle Guide was in complete error in attributing to him the quotation it did in its April issue and which I cited here last month. Rob states he never said anything close to what BG editor Mark Reidy said he said. Completely contrary to the implied attitude of those mis-attributed remarks, he goes to great pains to tell his bike couriers, and states in an instruction and policy manual they must read, understand, and agree to on their first day on the job, that safety comes first, way before the delivery of any package, he does not countenance riding that endangers pedestrians, motorists, or the rider himself, courtesy and respect must be shown to all, including the police, and their directives followed, and insurance is carried and no effort made to circumvent claims on it.

"Justice for (Bike) Messengers" is having a fund-raising breakfast May 4, 8:30-10:30 AM at $45 a pop; call (212) 581-8845. Where? Yep, irony lovers, you got it: in the unlikely and Tony Princess Ballroom in the Sheraton New York, the very hotel that advertised, as noted here in March, "We'd never suggest you try to tackle Manhattan on a bike" and offered their health clubs as "a safe alternative to trying to negotiate cars, buses and pedestrians." The proceeds from the breakfast are to help organize a union for bike messengers.

No, hey, wait! Before you crap on the idea, think: Although the inconsiderate and dangerous riding of the cowboys among them may be an extension of their overall f...you mentality and that wouldn't be changed by changes in their work conditions, bike messenger is damn hard and dangerous work, the work conditions dehumanizing, the pay squaid, and the benefits non-existent; and if messengers weren't paid on a piece work basis, the primary incentive for them to ride inconsiderately and dangerously would disappear. —R. Rosenthal

Palisade Left

On page 9 of this bulletin, NYCC member Richard Kaufman writes of being hit by a van (we note that's the second NYCC member to be put out of action by a van so far this year) while negotiating a left turn from 9W onto Palisade Avenue. We hate to see anyone hurt, so we're describing four ways to make that dangerous turn. The choice is up to you.

First is the legal way. Preparatory to making the turn, move into the left lane (the one with the huge left turn arrows painted in it) and turn left with traffic when the light is green to go ahead. Unfortunately, the Englewood Cliffs police are not very pro-bicycle, and they don't believe that is what cyclists should do.

The Englewood Cliffs police recommend cyclists stay on the extreme right of 9W, ride across the intersection, stop in the eastbound lane of Palisade Avenue and wait for the light to turn green before proceeding across the intersection.

The "Toomey Me.hod" is to ride through the 9W/Palisade Ave. intersection and make a left turn further south at a less busy intersection.

There's yet another way which avoids that last, aggressively trafficked section of 9W. Make a right turn at Sage (the first light after E. Clinton, just past LG Group building), then left at T onto Johnson Ave., then the first left onto Van Wagoner, and a right at the T onto Floyd. Floyd is an untrafficked straight shot to a T at Palisade Avenue where you make a left. This puts you on Palisade one block west of the 9W intersection.

May is a busy month in terms of cycling events. The ride listing includes many local events from other clubs and charity rides. Since we're staging our first century this coming September, NYCC members, especially century volunteers, could learn by attending or volunteering at these events. And, of course, we hope to see you on NYCC rides in Montauk and in Shinnecock.

On the cover this month, you see Mike Samuel's sell-out T-shirt design. With the coupon on this page, we've made it possible for members who weren't at that meeting to order by mail.

See you on the road! (Ass't Ed note: CB and I find Floyd a great street for a short, end-of-the-day race.)

“A” notes

by Rich Borow

Last month this column covered the “style” characteristic that differentiates “A” rides from other club rides—paneline riding. Now let’s talk about the other side of the club riding description equation: SPEED!

Ideally, all club rides should stick pretty close to the listed ride description cruising speed. But it should be kept in mind that this doesn’t mean that the paneline will always be moving at the same speed: the pace will slow down on climbs and will accelerate on downhill. In order to gauge your speed when you’re at the front of the paneline, it’s a good idea to take a quick glance at the speed function of your cycle computer while you’re still in the second position before you pull through. This way you can get a better idea of your tempo as you move to the front and can avoid abrupt speed fluctuations.

Another trick to maintain a steadier paneline is to make a conscious effort to pedal through the crest of a hill as you’re climbing. There’s a natural tendency to back off a bit as you make it to the top, but remember there’s others people right on your wheel that are still coming up behind you. And if you do find yourself running out of steam as you’re climbing, try to get over as far to the right as safely possible to stay out of the way of traffic (or faster climbers) who may wish to pass on your left.

I also want to clarify a point I made last month about letting retreating riders from the front move into a gap ahead of you if you’re having trouble holding the pace. This should only be done in the back of the paneline, don’t make it a habit of opening up gaps in the middle of the line to let people in—there may be other riders behind you who wish to take a turn at the front. (Of course, do let a rider in if he or she has a truck bearing down on them and needs to get back in the line quickly!)

If you’re not sure what to expect on a ride, or have any concerns about your ability to keep up, speak to the leader before the ride. Hopefully he or she will be able to tell you how fast the ride really will be going!

What are you doing on Sunday May 7?

Help us NOW to help cyclists escape in September. The NYCC “ESCAPE FROM NEW YORK CENTURY” committee needs volunteers to distribute flyers to cyclists at the Staten Island finish of the 5 Boro Bike Tour.

Spring Break

by Richard Kaufman

I didn't know the president of the New York Cycle Club would call you when you were hit by a car, until Geo called me Sunday night after I got out of the hospital.

Expressing his condolences, Geo then made an offer I couldn't refuse: "Would you write a piece for the newsletter about your accident?" (What a way to break into journalism.) It seems pointless to write such a piece unless there is something to be learned, to help others avoid the same fate. Otherwise we're just dealing with bragging rights: I broke more ribs than you! (I probably did.)

It was Sunday, March 26, about 11 AM. I had started in the park with other club members, but didn't feel like riding far, so I turned back at State Line. Now I was heading south on 9W, looking to make a left on Palisades Ave.

Signal, look back at the cars, wait for a break in traffic or someone to let you through. Signal again, repeat until you're in the left turn lane, or else cross Palisades and circle through the parking lot on the corner. I signaled and looked back. A car about 60 feet back slowed, the driver nodded at me, and I cut into the left lane.

NEVER ASSUME A DRIVER'S SIGNAL IS MEANT FOR YOU, OR IS EVEN A SIGNAL.

What I thought was a nod, was probably the driver looking at her radio. She never saw me. Six pedal strokes later I heard brakes squeal, and felt myself lifted into the air as a Ford Aerostar pushed my rear wheel under me. My back slammed the front of the van with a thud, then I was thrown forward as the van stopped, going over the bars. I found myself sliding on my helmet for several feet, then rolled onto my shoulder while sliding on hands, elbows and knees. I came to rest with the bike between my legs. My left cleat was still attached to the pedal. I unclipped, and started to stand, pleased I hadn't broken a leg. I felt no pain, just numb.

Another cyclist came up and took my bike. "I know it's hard not to want to move around, but the best thing is to lie down until the ambulance comes." He helped me lie down, he and his friends blocked traffic and called for help. He gave me my helmet for a pillow, apologizing because he had nothing else.

"My back slammed the front of the van with a thud, then I was thrown forward as the van stopped, going over the bars."

"Your bike looks like it's OK," he said, so I could relax. I watched him put the pump back on the frame. I don't know his name, or who he was riding with, but I'd like to thank him, if anyone can tell me who they were. I lay there staring at the van; the windshield had a hole the size of my head near the top right side. I couldn't remember what body part I'd planted there. Probably my head. I had an irrational feeling of satisfaction that the windshield was broken.

A dark-haired woman asked me why I had "drifted across the road." Must have seemed like a good idea at the time. I heard her talking to the driver of the Aerostar, asking her what happened. "I leaned over to change the station, and when I looked up, there he was in front of me."

"I know, some of those radio buttons are so far down you have to really bend..." was the dark-haired woman's reply.

A police car arrived. The chubby mustached policeman who stops riders and tells them to ride single file asked me what happened. I couldn't say much. It was hard to talk. The EMS came, strapped me to a stretcher and hoisted me into their ambulance.

"What day is it?"

"The 24th, 5th or 26th, I muttered, "something like that."

"OK, then, how much is 23 times 4?"

"A little bit less than a hundred."

I knew then I was loopy. They gave me oxygen through tubes up my nose as we drove off to Englewood Hospital, where I was x-rayed.

IF YOU HAVE NO HEAD, DON'T WEAR A HELMET.

A doctor looked at my helmet. It was impressively scuffed, abraded and cracked. "Without this, you would have suffered severe brain trauma."

"What does that mean?" I asked.

"You would have been a vegetable," he laughed.

"Come examine this guy!" he called to someone, who came over and asked me where it hurt, and how it happened.

"Now look at his helmet," the first intern said. There was a long silence.

"You've convinced me," said the second, "I'm buying one this weekend before I ride. What brand is it?"

The x-rays were developed, along with the bad news.

"You have four broken ribs, and a collapsed lung. You're not walking out of here today." They stuck a rubber tube in a hole they made between my ribs to vacuum out the blood, and inflatable the lung. This was more fun than I'd had all day, but as the pain subsided and I stopped screaming, they turned on the pump and I no longer felt like I was on top of Mount Everest. (Oximetry—a measure of blood oxygen—had been 46; normal is 98.) I spent three days in the intensive care ward with a box attached to me that gurgled like a fish tank. I got cat scanned. There was a stuffed Garfield cartoon cat grinning on top of the machine. (It's a cat scanner, get it?) It wasn't until Wednesday that a crack in my clavicle showed up on an x-ray. It was just a little one. hard to see.

If you ever have to spend time in a hospital, I recommend Englewood. I've got nothing but nice things to say, especially about the nurses. (The doctors aren't bad either.) It seemed as if everyone who rode a bike came by to talk to me, interns, nurses and orderlies. (Mostly mountain bikes, and mostly Treks, plus a couple of Cannondales, if you must know.)

Davis Phinney warns in his book, Training for Cycling, that hospitals do not know how to treat road rash. "We don't have to put dressings on those, they just scab over" the nurses told me. I explained that since the scabs would be directly over my joints, they would be painful when I moved. The nurses then dressed my knees and elbows with bacitracin and bandages. I can't imagine that happening in a city hospital.

My wife went to the Englewood Cliffs Police station to pick up the bike: it had no frame pump. She received a lecture on bicycle safety: 'The proper way to make a left turn is to walk the bike across the intersection. He's going to get a citation in the mail.'

She picked up a copy of the police report. I refrained from reading it, or the citation, until I left the hospital some five days after the accident. The report says I struck the van from the side, damaging the vehicle. I have a ticket for making an "illegal lane change." The constabulary in that town is not pro-bicycle.

I've been out of the hospital a week, and am already riding on a wind trainer, without too much discomfort. Taking it easy until the ligaments in my left leg heal. They were probably twisted somewhat in the crash as I didn't snap. I expect to be well recovered in a couple of months.
Blowouts

Congratulations to Shari Horowitz and Bob Foss, I think. They recently announced their engagement, but I’m not so sure about it. Shari has tried everything to get her name in this column to no avail. Could this all be an elaborate ruse on her part just to get mentioned here? Be careful, Bob!

The following came in via fax from Maggie Clarke:

Irv Weisman was heard chortling with delight while the “A” Sig riders were assembling at the Boathouse one Saturday in April. He had spotted his friends Jody Sayler and Christy Guzzetta. “A” Sig Leaders, wearing bright colored windbreakers instead of “road kill” black. Irv hopes they will inspire others to do similarly, so that they all can “be seen and not hurt” on the road.

Actually I thought that the “A” riders always wore bright, outlandish colors. I think Irv has been spending too much time staring at Lori Vendinello’s cranks to notice what people are wearing.

If anyone has any questions on levers, just ask Noel Comess. He’s our resident expert on the subject.

The April Club meeting was on heart rate monitors. Joe Coplan of Polar was trying to explain how to determine your anaerobic threshold. Caryl Baron says it’s easy, “When you get dropped from the paceline, you know you’ve reached it.”

Thank you Miguel Vilano (rhymes with Figaro) for leading rides that we didn’t know there was a need for. Who would have thought that over a dozen people would show up for a 125 mile ride the first week in April. Miguel’s Paris-Brest-Paris training series will continue with even longer rides this month.

The quote of the month comes from an anonymous “A” Sig rider whose excuse for getting dropped several times on the first few rides was “I never rode in traffic before!”

And instead of a cycling proverb this month, we’ll quote a line from Loretta Lynn’s latest hit, Cycling Blues. “Jesus, help me turn the cranks just one more time.”

We haven’t had a Road Bozo award since January, but this one is so good we may have to retire the award, or at least rename it the Nelson Mora Road Bozo Award. On one recent ride Nelson was apparently paying more attention to the conversation going on behind him than to the obstacles on the road ahead of him. He was only going about five miles an hour through the town of Englewood when, in a moment he would like to forget if we would let him, he rear-ended a parked car! So, the next time someone calls out “car left”, “car right”, “car back”, whatever, pay no attention. But when you hear “parked car,” think of Nelson!

I’m very sorry this column is so short, but last month was a very taxing time for me. Hopefully, next month I’ll have a full column of news and gossip.

Alphabet Soup

May is here at last! For much of the club this means it’s the beginning of prime cycling season, for others it’s the sheer relief of accomplishment as two of the three Sig groups graduate during this month. Congratulations to all who participated and stayed with it to graduate. Now, since you’ve got the jump on the rest of the club you become the prime candidates to lead rides...

Out of Bounds

The steady flow of “alternate ride” opportunities begin this month. Starting with Saturday’s Farmlands Flat Tour in New Jersey, sponsored by the Central Jersey Bike Club. Sunday May 21 has a twin-bill, the Montauk Century held by 5BBC and AYH and the Bloomin’ Metric in Connecticut by the Sound Cyclists. Keep your eyes open for more bulletin listings.

NYCC Special Event

Don’t think that we don’t have our own ‘Out of Bounds’ within the NYCC. The first of the annual NYCC ‘bike trips’ will occur over Memorial Day Weekend. All levels are welcome to enjoy the Berkshires for three days of wonderful riding. Contact Ed or Mary Allen (212) 666-6844 if you are planning to go or if you have additional questions.

Not to go overlooked is the first of the three NYCC all-class outings. On Sunday June 11 we head to Tallman State Park for a club rendezvous. Rides for all levels will be available. Check your local listings in June. Unfortunately the free lunch will not be available this year, so plan your lunch accordingly.

The Road

On a serious note, incidents have been reported concerning the intersection of Palisades Ave and 9W. The left-hand turn onto Palisades Ave is a dangerous one. Usually a group of riders can secure safe passage across the two lanes of traffic, but a solo rider is much more vulnerable. (See article on page 9.)

As we have learned, nothing can be taken for granted! So please, signal your intentions and trust noone.

Mountain Biking

A lot of bad news has been circulating about mountain biking. Many trails are off-limits and others are reportedly being sabotaged. South Mountain is currently off-limits as is Harriman State Park. In addition areas around Rockland Lake are presently in this same off-limits category. The New York Times reported that the Palisades Interstate Park Commission is planning to open up 6 miles of fire roads for mountain biking. They didn’t report whether this was intended solely for mountain bikers or would be shared access.

The reports from South Mountain are of cords being tied across trails. This obviously is not an obstacle a single-tracker is prepared for.

I’ll keep you posted as I hear more about this subject.

NYCC Century

Believe it or not, the first NYCC Escape From New York Century is just around the corner! (Actually, it starts at Grant’s Tomb.) There is plenty to be done and the club needs your help. Call either George Kaplan (212) 989-0982, Jane Kenyon (212) 662-1935, Mitch Yarvin (212) 769-2637, or myself (718) 202-4970 if you want to help put on the best century event New York can offer.

MONTAUK BUS info

The NYCC has reserved two busses to transport you and your bike from Montauk back to New York City after the Montauk ride on Sunday, May 21. There will be ample snacks and drinks on board to restore you after your ride. The cost is $30.00 per person. Reservations were closed April 25. If you haven’t reserved, and are counting on the bus to return to NY, call George and hope someone has cancelled!
Minutes

MINUTES OF THE NEW YORK CYCLE CLUB BOARD MEETING OF TUESDAY, MARCH 7, 1995

The minutes of the meetings of February 7, 1995 were approved.

Geo advised the Board that the town of Piermont would be sponsoring a youth cycling fair and had asked for helmet donations, as well as club assistance in providing instructors and marshals. Rich suggested purchasing the helmets through the Piermont Bike Shop. The Board authorized the expenditure of $120 for kids’ helmets and agreed to participate.

Barbara noted that bike shops had complained that cyclists tried out equipment for size in their store and then purchased mail order. She wondered if the club could do anything to deal with this problem.

Geo discussed the problem of late mailing of the bulletin. Lori suggested photo-copying might be cheaper than printing and Geo agreed to follow up on this.

Next the holiday party was discussed. It was the sense of the meeting that the 1995 holiday party not be subsidized. It was also agreed that the party would feature a cash bar, though no final plans were adopted.

Lori announced she was organizing a getaway weekend for July 21, 1995. Mitch indicated the century committee had been disappointed by the Board’s decision not to authorize half-price memberships in conjunction with the century.

Geo asked Board members not to go southbound on the park drive when exiting the park.

Respectfully submitted
